

Atmospheric Foam Concentrate Tank

The Incendium atmospheric foam concentrate tanks have exceptionally good chemical and corrosive resistance. The AFT comes in several different sizes ranging from 60 to 15000 liters with the option of white semi-clear or black. Tanks from 60-1500L comes with level indication on the tank itself (does not apply for black material tanks). Tanks from 1800-15000L are built more robust and therefore needs a separate level indicator.

Incendium provides a large amount of connection options for these tanks; for example threaded or flanged connection. All connections are robust and designed according to industrial applications.

Material:

Tank:

Polythene

Product Features

- Optional color black
- Optional low level sensor
- Vacuum/vent valve included

DIMENSIONAL DATA

Model	Volume [L]	Diameter Ø [mm]	Height [mm]
AFT-60	60	450	500
AFT-100	100	520	650
AFT-150	150	560	780
AFT-200	200	560	970
AFT-300	300	650	1135
AFT-500	500	750	1385
AFT-520	520	830	1220
AFT-1000	1000	1050	1380
AFT-1500	1500	1070	1985
AFT-1800	1800	1355	1600
AFT-2200	2200	1355	1870
AFT-3000	3000	1410	2230
AFT-5000	5000	1800	2290
AFT-7500	7500	2140	2340
AFT-10000	10000	2140	3085
AFT-15000	15000	2140	4700

TECHNICAL DATA

Volume indication:	Included on tanks 60-1500 L
Temperature range:	-30° C to +70° C
Lid type 60-1500:	Threaded plastic lid with o-ring seal
Lid type 1800-15000:	Clamped lid with o-ring seal
Tested according to:	Normpack
