

## Remote Controlled Electric Actuator

The Remote Controlled electric actuator (RC) is an actuator for on/off operation of a butterfly or ball valve such as the BFV or BAV. This actuator comes in several sizes and offers a standard operation of 0-90° turn.

The RC is limited to this range through the use of limit switches or mechanical switches. The motor is protected against overload by thermal lining in the casing. Heating radiators keep condensation from building up in the actuator.

### Material:

Housing:	Anodized Aluminum
Coating:	Primer and red epoxy
Piston:	Aluminum Bronze

### Product Features

- Manual override with automatic disconnection
- 2 limit switches
- 2 potential free mechanical switches for communication and control systems
- Robust construction
- IP67 with option for Ex d II T4 as well as IP68
- Easily read indication for open/closed
- Permanent greased gear
- Torque and thermostat overload
- Temperature range -30°C to +70°C

### OPTIONS

Explosion proofing	EEx d IIB IP67 Ambient temperature: -20°C to +55°C
Protection form	IP68
PIU	Potential current measurement: 1k Ohm
CPT	Limit switches signal out 4-20mA DC
Power supply	24VDC, 110VAC, 400VAC

All parts have been selected for reliable and trouble free service using corrosion resistant materials for low maintenance.

### PERFORMANCE DATA

### Standard make

Start phase	50% ED
Protection class	IP67 Nema 4 and 6
Power supply	230 VAC
Temperature range	-30°C to +70°C
Heating radiator	20W
Cable inlet	2 pcs M20x1,5
Limit switches	Open / Close position 2+2 pcs
Torque switches	Open / Close position (RC 015-060)
